Once you have the marks lined up remove the bolts holding the timing chain to the cam and crank. Remove the timing chain as a whole unit with the cam and crank gear still on it. If the crank gear doesn't want to come loose use your puller on it. when you get it off just put your new gear on and line up the timing marks then put it back on as one unit. If you cant get the crank gear on all the way by hand buy a crank install tool (summit) they run about \$24.

It was pretty much like replacing timing belt, except with way more RTV. Over all I replaced two oil pump O-rings, front crank seal, valve cover gasket, both chain guides and chain tensioner. In retrospect I prefer timing belts as opposed to timing chains, especially considering that the tensioners still fail on chains occasionally. Interesting ...
