MAVLink Developer Guide. MAVLink is a very lightweight messaging protocol for communicating with drones (and between onboard drone components). MAVLink follows a modern hybrid publish-subscribe and point-to-point design pattern: Data streams are sent / published as topics while configuration sub-protocols such as the mission protocol or parameter protocol are point-to-point with retransmission.

Access to flight settings and satellite map view 3. Smart Shots: one-touch cinematic ...

3DR Solo - Apps on Google Play

I am familiar with needing to learn to pilot my drone, becoming part107 certified, and being insured before using it commercially. Alarmingly, drone pilots I have been subcontracting have proven to me that they are winging it when it comes to rules and I am not ok with that. As a professional and as a liability risk.
