Lab 5 Ap Sample 4. Introduction: Cellular respiration is the release of energy from organic compounds by metabolic chemical oxidation in the mitochondria within a cell. There are a number of physical laws that relate to gases and are important in the understanding of how the equipment in this lab works. These are summarized as general gas laws that state:  $PV=nRT$  where: P stands for pressure of the gas, V stands for the volume of the gas, n stands for the number of molecules of gas there are ...

### AP Biology Lab Answers? — College Confidential

The purpose of the lab was to test out osmosis. No, my results did not exactly support my hypothesis because the bag with 0.0 M of sucrose should have a change of mass of 0, but instead, there was still a change in mass (4.9%). What can be concluded from this lab though, is water does follow higher concentration of "salts" for balance purposes.

### Diffusion & Osmosis Lab - AP Bio

Answer 2: "The CO2 and O2 probes both work... and, yes, they require the least fussing. But I still opt to use the gas pressure sensor. The gas pressure sensor is least expensive. But that aside, when measuring pressure changes, this lab teaches the students more about experimental design than any other lab we do in AP Biology.
