A cross-reference allows you to link to other parts of the same document. For example, you might use a cross-reference to link to a chart or graphic that appears elsewhere in the document. The cross-reference appears as a link that takes the reader to the referenced item. If you want to link to a separate document you can create a hyperlink. Create the item you're cross-referencing first. You can't cross-reference something that doesn't exist, so be sure to create the chart, heading, page ...
