The 2,2 Speedster has an oil cooler fitted, connected to the top of the oil filter. That is notan ideal solution and therefore I modded the LSJ adapterplate so it now uses only the cooler return through that. The oil cooler feed is coming directly from the block's oil gally, like the Z22SE has in a Speedster.

In most cases, manuals will give you the oil pan capacity, then tell you to add one quart if the car has a filter. Next, start the engine. Inspect for leaks around the oil filter or the drain plug. Check to make sure that the oil pressure monitor light stops glowing or that the oil pressure gauge indicates normal pressure within 5-10 seconds.
