monitors are easy to use and can measure the electricity usage of any device that runs on 120 volts. (But it can't be used with large appliances that use 220 volts, such as electric clothes dryers, central air conditioners, or water heaters.) You can buy electricity usage monitors at most hardware stores for around \$25-\$50.

Energy consumption calculation The energy E in kilowatt-hours (kWh) per day is equal to the power P in watts (W) times number of usage hours per day t divided by 1000 watts per kilowatt:

$$E(\text{kWh/day}) = P(\text{W}) \times t(\text{h/day}) / 1000 (\text{W/kW})$$
