Troubleshooting

For correct engine performance and to guard against dust entering the engine, causing rapid wear, the air filter assembly must be clean and maintained in good condition. VICTA recommends that the air filter element and seal ring are replaced annually, or more often in dusty conditions.

If it is cracked, shattered, or missing, set the engine to TDC (top dead-center) exhaust stroke (both valves will be opened slightly). Align the flywheel magnets with the magneto and replace the key. To remove the flywheel, pry up from the bottom while striking the top of the crankshaft with a hammer.
